BILPLAS DEFENSE

Products: Plastic Injection, Rubber Pressing, 3d Prototyping, Laser Cutting, Apparatus Cutting, Installation & Production Completion, R&D and Design

Bilplas Defense is a company that produces special products for the defense industry. With our 28 years of experience and solution partner structure, we produce plastic and rubber parts needed in the defense industry. Since the day it was founded, our company has produced over 15000+ different parts, support the R&D process of all of them, and is in agreement with more than 60+ Defense industry companies (Aselsan-Roketsan-MKE-FNSS-Nurol-Baykar etc.). Currently, our company provides services with 50 personnel and 5150m2 closed state-of-the-art facilities. Our productions; Land vehicles, Communication and Radar Systems, Night Vision, Avionics, sealing etc. continues as. EMI rubber and Cold neoprene coatings are our own R&D projects.

Bilplas Defense is your solution partner for all kinds of projects for the Defense Industry.

Bak Rubber
COMPANY

BUYUK ANADOLU RUBBER

Products: Rubber, Rubber-to-Metal Bounded Products , Wedges

Our company has been manufacturing Rubber Spare Parts since the 1980s. Our products such as Generator Wedges, Anti-Vibration Wedges, Pipe Drag Wedges, Lift Spare Parts, Conveyor Roller Tires, Bellows, Hoses, Couplings... And Plastic parts. There are company laboratories, quality control, and the R&D department in our firm. We also produce special production depend on our customer desires.

EMİN İPEK MACHINERY RUBBER

Products: Hydroelectric Power Plants (HEPP), Energy and Mining Sector, Rubber Sealing Elements, Hes Rubber Dam Cover Gaskets, Thermal Power Plant Rubber Spare Parts, Rubber Special Productions

Since 1982, we have been providing services in the rubber sector. We have been continuing our activities as Emin İpek Machinery Rubber Ltd. Co. since 2008. Our main target group as a company is the energy sector. We are capable of producing various rubber dam shuttering for Hydroelectric Power Plants (HPP) and in dams, turbine water inlet joints, conical valve gaskets, swing check valve gaskets, rubber metallic bearing bushings, rubber and plastic parts for thermal power plants in special dimensions, and rubber-filled wheels of various diameters. In our machine workshop, we can also produce various types of molds.

Although we do not export directly, our company's products have been indirectly sent to countries like France, England, Italy, Germany, and Austria.

OREN RUBBER

Products: Spare parts for construction machinery made of rubber, Air curtain, Hose holder, O-ring, Wick, Rubber coating of children's playgrounds, Bridge supports, Conveyor belt rubber, Dam belts.

Our company has been serving in the rubber industry in Ankara Keresteciler since 1972. It continues its work uninterruptedly with the aim of providing optimum quality service to its customers in Ankara and throughout Turkey, together with its team of 20 people and management staff who are experts in their fields. Among the sectors we serve; construction equipment sub-industry, automotive sub-industry, machinery industry, construction industry, food industry, etc. Many sectors are coming. Our facility operates with 1000 m2 closed and 500 m2 open area. There are hydraulic presses of different sizes in our facility, and all kinds of rubber are manufactured from the smallest piece to 1600 x 2000 mm. In the production of sheet rubber, production can be made in the desired length of 1550 mm x roll. In the products we produce; NR, SBR, EPDM, CR and many other rubber types are produced according to the requests of our customers.

Our company, which constantly enriches its customer portfolio with its production capacity and service offered through machinery and technology investments, has also accelerated its efforts to expand its product range. With its expert staff and experience in the sector, our company continues its production for our valued customers by keeping quality and customer satisfaction above all else.
